MAIN EXPERIENCE

Full-Stack Developer

[Zipdin](#), Remote

June 2023 - current

- Collaborated with other team members to architect new components.
- Maintained 8+ systems applications as Tier 3 support.

Junior Full-Stack Developer

[Zipdin](#), Remote

April 2022 - June 2023

- Developed an API gateway with a lambda function to connect 2 external services and took just one result.
- Wrote 100+ unit tests to verify the functionality of user interfaces.
- Documented 100% of the API created by me.
- Developed 10+ new API's.
- Designed, developed, and modified 15+ screens, modals, forms.
- Developed an API to multiple signatures with digital certificates.

Internship

[Zipdin](#), Remote

February 2021 - April 2022

- Developed 20+ interfaces containing forms, modals, and more.
- Built several APIs and maintenance services using Java
- Created documentation to quickly onboard coworkers to the database system

EDUCATION

Rio de Janeiro State University — Bachelor of Computer Engineering

February 2016 - current

I was part of a junior company when I started programming. There I developed soft skills such as communication with clients, team members, and taught other people about technologies.
